- Very useful insight into consultant job/role/contract and infrastructure
- practical skills
- excellent talks , interactive
- one of the best courses I have recently been to. Very practical, useful tips for daily practice. Even not being urologist, I think I have gained a lot! As there are people from outside urology it may be useful that speakers from industry give advice for other specialties. Thank you.
- v helpful
- patient contract really helpful
- very good course overall
- would have been more useful to spend more time on complaints and business planning and NHS structure and less on person styles and soft topics
- May even be aimed at younger trainees especially the management and leadership
