Delegate responses

Feedback from the September 2026 BPH / BPE Management course — the medical, minimally invasive and surgical management of benign prostatic enlargement for ST4/5 urology trainees, combining expert-led teaching with hands-on workshops and interactive case discussion.

In partnership with KARL STORZ and Boston Scientific.

In their words

“Knowledgeable and approachable faculty. Excellent venue. Very relevant information to daily practice.”

“Very useful hands-on course. The discussion is really helpful and valuable.”

“Great speakers — knowledgeable and friendly, open to questions and seeking feedback. The content was great and suitable for our stage of training.”

“Excellent day. Enjoyed and learnt a lot.”

“Very good experience. Highly recommended.”

“Well organised day.”

Suggestions for improvement

We review every comment. These are the improvements delegates suggested — and that we are taking forward for future courses.

What delegates suggested

- Integrate the hands-on practical into the teaching sessions — alternating short lectures with hands-on time — and include TURP simulation with more discussion of technique.
- In the complications talk, add a slide giving the percentage frequency of specific complications so they can be compared across treatment options.
- Frame the “What treatment would you offer this man?” session around two or three model case scenarios (prostate volume, flow rate, comorbidities) to structure the discussion.
- Advertise the course more widely — more trainees would be interested if they knew about it.

Thank you to everyone who shared their feedback. It directly shapes how we run every course.
